Reseller License R4E / MRR / PLR - Classifieds Market Pro V6.2.1 – Responsive – Version December 2020 German version for Germany, Austria, Switzerland

With our new Classifieds Market Professional V6.2, you acquire a complex classifieds market with a shop, directory, and company directory, including a powerful newly designed administration area with numerous new features and now 2 designs, which can be conveniently activated or deactivated in the admin.

Included are 30 pre-made sections and more than 300 categories, which can be deleted or supplemented with your own at any time.

Our Classifieds Market Pro V6.2 is characterized by clarity and comfortable menu navigation – even the "inexperienced" occasional surfer will find their way around immediately and will not be overwhelmed by resource-wasting gimmicks, unnecessary functions, and confusing link blocks.

The uploaded product images are converted to thumbnails server-side. Instead of the original image, e.g., 100 KB, much smaller images (thumbnails) of only a few KB (between 1.5 and 8 KB) are generated and sent to the browser – this reduces download time and significantly speeds up page loading!

The (unencrypted!) PHP code is also easily understandable for beginners and can be easily adapted to your own ideas with basic knowledge of PHP and MySQL.

Two CSS-based designs with 8 pre-made templates and numerous pre-made text pages such as imprint, data protection, terms and conditions, cancellation policy, FAQ, search tips, etc. are also included.

Changes / New Features in V6.2.1:

Many smaller detail improvements & bug fixes
